RE: Sunscreen and bug spray policy

Dear Parents:

According to sunscreen application directions, it is important that sunscreen be applied at least thirty minutes prior to sun exposure for maximum protection. Since children arrive at different times we ask that parents apply sunscreen to children each morning prior to arriving at Rockwood Acres. Please apply the sunscreen with the assumption that your child/children may be outside for part of the morning hours. Rockwood Acres will reapply sunscreen for any afternoon outdoor activity.

With these instructions Rockwood Acres staff will assume that all children are properly protected against sun exposure until 12:00 pm each day. If you have any special concerns or instructions for your child/children please note them below.

Staff members are to apply community bug repellent before outdoor recess.

If you have any questions, please do not hesitate to ask. Please sign the Sunscreen Policy Agreement below and return it to me immediately. Thank you for your cooperation.

Sunscreen/ Bug Repellent Policy Agreement

I have read, understand and will follow the Rockwood Acres Sunscreen Policy.
